

MOVIAL ENABLES DEVICE MANUFACTURERS AND SERVICE PROVIDERS TO ACCELERATE PRODUCT DEVELOPMENT

MOVIAL PROVIDES SUBCONTRACTING SERVICES AND COMMUNICATION SOFTWARE TO DEVICE MANUFACTURERS, SOFTWARE VENDORS AND SYSTEM INTEGRATORS. MOVIAL ENABLES A REDUCTION IN RESEARCH AND DEVELOPMENT COSTS, A FASTER TIME-TO-MARKET, AND A DIFFERENTIATED PRODUCT OFFERING.

Movial provides subcontracting services for device manufacturers in all R&D phases. Our expertise ranges from low-level kernel programming to Graphical User Interface design, driver development, and application development. Furthermore, Movial is highly experienced in various embedded Linux distributions, GUI toolkits, hardware platforms, networking technologies, programming languages, and development environments.

Movial's communication software products include Wireless Instant Messaging and Remote Diagnostics software. We have developed Wireless Instant Messaging applications for smart devices based on various standard protocols. Movial's Remote Diagnostics software enables wireless and wired real-time monitoring and control of machines independent of time, place, and access terminal.

Movial employs currently approximately 90 developers. Our office is located in Helsinki, Finland. Movial is a privately held company owned entirely by its management and employees
